FLOWSTAR NEWSLETTER - NOVEMBER 2026

VALVE WORLD EXPO 2026

We're pleased to announce that our colleague Graham Henning will be attending Valve World Expo 2026 in Düsseldorf, Germany, from 1st to 3rd December. Graham will be joining our valued manufacturing partner Niezgodka at their stand in Hall 1, Booth F13.

Valve World brings together leading manufacturers, suppliers and industry professionals from across the globe, providing a fantastic opportunity to discuss the latest developments in valve technology and industrial applications.

If you're attending, be sure to stop by and say hello! Whether you have a specific valve requirement, an upcoming project or simply fancy a chat about anything valve-related, Graham would be delighted to meet you.

1,800+ BAILEY VALVES IN STOCK

At Flowstar, we stock thousands of Bailey valves for next day delivery, offering reliable pressure protection and reduction solutions for a wide variety of industrial and commercial applications, helping minimise downtime and keep your operations running smoothly.

Our range includes the popular 337, 707, 716 and 746 safety valves, 716T pressure and temperature relief valve, 480 relief valve and G4 pressure reducing valves. Designed for reliable pressure protection or pressure reduction, these valves are suitable for steam, air, gas, water and other liquid applications, helping protect equipment from excessive pressure and maintain consistent operating conditions.

API SAFETY VALVES FROM STOCK

Designed to protect equipment from excessive pressure, API safety relief valves are commonly used in the oil and gas, petrochemical, chemical processing and power generation industries. They provide essential protection for pressure vessels, pipelines and industrial systems.

Flowstar stock and supply valves manufactured in accordance with API 520, 526 and 527 requirements, with a selection of sizes, materials and set pressures available to suit different operating conditions. Our experienced team can also assist with selecting the correct valve for your application. Contact us today to discuss your API safety valve requirements.
